DAILY SENTINEL. BY TELEGRAPH

BY SPEED'S LINE. Lieported for the Sentinel. Fire at Chicago.

Chicago, January 30th. About 10 e'clock yesterday morning, a fire bruke out in the American car works on the lake shore, some two miles from the centre of the city. Time fire was first discovered in the building use as the foundry, black smith, cleaning and moulding shops. It is supposed to have taken from a store in which a fire had been built about an hour previous. The flames spread to all parts of the building which was of brick, and one story in beight, fortunately through the exertions o the workmen, most of whom live in the immediare vicinity of the factory, and some of our citizens, the fire was prevented from spreading to the other pertions of this splendid establishment which is the finest in the city. The extensive machine shop, a wooden building, was in much danger but was saved. The loss is estimated at about 10,000 dollars, but this must be much less than the actual damage, as the great injury consist in the fact that the works will be obliged to sushend a few weeks their extensive operations, by which some 150 hands will be thrown out of emsuccesses for that time. A large number of valuanaturns, tools, &c were lost, most of the workmen saved their tools.

I.a Creme and Milwanker Rull Road. We here said but little of late about this enterprise, but have kept a vigilant watch of the progress of the work, and are glad to be able to state that our observations have convinced us beyond a ressonable chance for doubt, that this great undertaking will be pushed shead with lat greater energy them any other line in this state, and though the tightness in the money market may occasion some delay, yet its ultimate completion to the Wisconsin River, and finally to the Mississippi, may be set down at a far earlier day than many of its most sanguine friends could have anticipated one year ago when we first began to talk about it. Large gaugs of hands are now constantly employed on all the sub-contracts from Milwaukee to Horicon, and we are informed that the grading between those points will be completed certainly by the first of Jane next. The ties are also being delivered along this portion of the read, and by mid-summer we doubt not that portion will be completed and regular trips made over it. West of Horicon at present there is nothing doing except completing the preliminary surveys, obtaining the right of way, securing stock de. However, this ie not long to be so. Win-d. Dawes, the Treasurer of the Company, and who is a man of extensive means, has perfected a contract with the holders of the read, Messra, Bradley, Whitemore & Co. by which he assumes the building of twenty-four miles of this road, cammencing at Horicon, and running west, and it is his intention to commence operations within a very short time. He will be here within a few days to attend to the stock of the company, or who may wish to do so, will have a clanne to pay their subscribed to the We here said but little of late about this ennester, and all those who have subscribed to the stock of the company, or who may wish to do so, will have a chance to pay their subscriptions either in work or furnishing material for the beilding of the road, and they are to have the preference in the letting of the work. He is also prepared to let contracts for cash, or monthly estimates, and we have every reason to believe that this contract will be drivenforward, to a specify completion. The finances of the company are in an excellent condition. Thair liabilities are promptly paid, and everything looks well for the interests of the work.

The meeting of the Stockholders for the election of Directors for the cissuing year is to be for the interests of the work.

The meeting of the Stockholders for the election of Directors for the ensuing year is to be held at Fox Lake on Wednesday of next week, being the first day of February, and we trust its result will be for the best interests of the road. Every Stockholders should be there! You who have your farms mortgaged to this Company are desply interested in the success of the entarprise, and no trivial cause should prevent you from attending to it yourselves! Your presence may be the means of infosing into this already animated project a whirlwind velocity, which shall bear down everything before it, and groutly hasten the day for which you look so eagerly, when the poducts of your farms shall bring almost as much at the meanest depot as it now brings in Milwauke, thus saying you an inducently of labor in marketing it, and leaving you to devote the vast surplus for your own comfort. Let there be such a universal turn out of the Stockholders of this road at Fox Lake on Wednesday next as there was at this place last spring and it will greatly serve to invigerate the Board of Directors then to be elected, for it will show that the people are alive to their own interests, and that they can confidently rely upon their hearty co-operation in the work, while if but few attend to this important business, the work may be greatly retarded thereby. But why need we talk in this way? We know the feeling of the farmers Stockholders in this section and know they are every one of them deternined to do their share towards for wording the work. Let unity prevail amongst you. We see no prespect of discord and hope there will be none. There may be some rivalry for promotion, but we say to you all, let the in coming Board, whoever they may be, have your united nesistance, and this road shall be complefor promotion, but we say to you all, let the in coming Board, whoever they may be, have your united assistance, and this road shall be completed so that you will materially feel its benefit before another twelve-month. The Agonts of the road are busy at wark in many places Deacon Clinton passed through this place yesterday, on a tour to Berlin, where he expects to make some favorable arrangements for the Company. He has landly been to La Crosse, and found them all alive to the importance of this work, as well as the inhabitants all along the line. Everything looks prosperous, and we tust nothing will occur to mar the reneral good feelings which provails, or retaid the progress of the work.—Beaver Deam Republican.

GREAT WESTERN RAILROAD -The steamer Dar. Capt Custin, brought over a load of five hundred passengers about ten o'clock yesterday morning. The Dart made her way notwithstanding the apparently unposettable mass of icewhich blocked up the river.—De'roit Inquirer.

Mr. Empror:—As a matter of great inserance. About all limits are a significant of the filliple of the filliple of the significant limits were usually paralyzed. A doctor was called, who bled for copiously in the right arm, which relieved her, and she had no more symptoms of parelysis, until last fail, when the right arm gradually became weak and powerless. Both limbs and the whole of her right side soon became perfectly benumbed, and all voluntary motion was entire y suspended. She was bled again, but without any relief. Even her tought lecenso paratyzed, so that she cauld not, at times, speak so as to be understood. She had a brother, Thos. I have a word to say to you, in favor of Hunter's Cough Syrup. Thave the past year used in my practice, two dorsen bottles of it, which I lind of you, and every bottle has done good. For eight years past, I have been in the practice of Medicine, and I never have found any thing, so well is considered to operate so favorably in all diseases of the language that is. Thave known a hard, distressing cough, cured in forty-eight bours, by using (in broken doses) one bottle of it. One case here in particular, of a man who was thought to have a seated consumption, troubled with a hard distressing cough. I let him have one bottle, and he had two more or year. Agent, Mr. Whitmore. After using the 3 hottles, he has become well, and now labors every day. He toid me lately, that Eunes's Casain Syrup was the means and only means of his cure. I have given it to inform you that it has done good in every case. I shall do all in my power to recommend it in the naces above unmed, und wholy for your benefit, but for the benefit of suffering humanity.

Madison, Jan'y 28, '54. Prof. Daniels' lecture, delivered last evening in the Assembly Hall to a large audience, folly windicated the wisdom of the measure, which established the office of State Geologist; and in no respect have I seen so great a change in regard to that measure as in the feelings of the delegations from the lead regions of our State. Last Winter, the till was passed, in spite of the constant oppomition of members from that region ; but this year, mone are so lond in their praise of the policy. is well. Prof. Daniels has labored energetically in his survey, and his Report, now passing shrough the press, will give its results in His lecture last evening gave as a general description of the formation of the lead district, and several important conclusions drawn from his examinations. I proceed to give a sketch of the address from my notes, trusting that sufficient interest will be excited by it to cause a liberal cirexistion of the Report, when it appears.

The Lead region of Wisconsin is one of the most extensive in the world, containing about 3,-500 square miles, lying in the South-Western curner of the State, and having for its general boundaries, the Mississippi, Wisconsin, and Sugar rivers, and the south line of the State.

Colored maps, displaying sections of the geological formations, were shown, and aided materially in understanding their actual and relative beggion. It is a remarkable fact that through all this region there are no traces of the great "drift" of gravel, sand, &c., which is spread so thickly over the surface of the rest of the state. Prof. Daniels thinks there are udmistakable proofs that at some far distant period of time, the Mississipp river flowed as a wide sea, 400 feet above its present level. In the beds of clay, which, at some points, form the upper deposite, or stratum, have becu found numerous remains of animals, of the order mammalia, such as the mastodon, elephant, &c. At Pairplay, imbedded in clay at the depth to feet, romains of the former have been found, but they crambled to dust, upon being exposed. At Potosi were found bones of an elephant -known to be such by the teeth, which are unmistakable. At Sextonville were found other elephant bones; and the lecturer here exhibited part of the tooth of this monster of the ancient days. Great changes of climate and vegetable life must have occurred since these animals roan ed through what is now Wisconsin.

The lecturer next proceeded to remark briefly upon the unparalleled extent of the mineral re cources of this portion of the state.

From this he went on to describe, with the aid of the maps, the various strata which succeed each other as the survey proceeds downwards. These examinations are made either in mining shafte, or where the different rocks are seen outcropping in the ravines and on the banks of

The upper stratum is a limestone, of a cornlline structure, and is now only found in the mounds which here and there stand alone in different parts of the region. The Platte and Blue Mounds are examples, the latter being of this formation, to a hoight of 250 feet. The lecturer exhibited specimens of true coral from this locality. This rock, the work of a marine animal, is proof positire that the region has been underwater. Prof. Daniels thinks that the only reason why these mounts remain in place when the cognate formstion has been washed away, is their superior hardness; or else there may have been some condi tion of the corrents which caused the great wash or waste, which left them standing, while they swept

Next below, and immediately at the foot of the mounds, but washed away from much of the present surface, is a bed of shale, which has been reced in Iowa for a great distance. It is 10 to 15 feet thick, and entirely composed of a concretion of minute shells, and petrifactions of marine animals of a former period. It is sometimes very hard, and sometimes so soft as to be easily

Next, we come to the gray limestone, known through the mining country as the leadbearing rock, rauging from 50 to 150 feet in thickness. It should be remarked that all of these success sive deposites lie in great wedges—that is thicker in some parts than others, the relative thickness at a part cular locality being the same, as a general

In this leadbearing rock the work of the miners has been done, the lead being found in fissures in the rock, and until lately, it has been supposed that the lead voins were broken at the bottom of this stratum, and did not reappear.

Next below, in order, we come to a thinner stratum of blue limestone, very hard, and susceptible of a polich, forming a good building material. Next, we reach a stratum of a buff colored limestone, varying from 30 to 110 feet in thickness This yellowish limestone is the same that crops

out in the vicinity of this place, and of which the Capitol and various handsome buildings are Below this, we come to a stratum of sandston sometimes very hard. In this deposite, no fossile of anything possessing life have been found.

Next to this, and the lowest stratum to which the survey and the notice of the Geologist extend-

ed, is the great deposit of magnesian limestone containing much flint rock.

about 10 feet to the mile. An opinion has very widely gained ground that most of the lead deposits have been exhausted, and that the veins were only, as it were, accidental, and broken at the bottom of the gray limestone, and that it would not be a safe investment to go into expensive systems of experiments. Accordingly, the attention of the geologist was turned to the question as to whether or not those veins are true ones ; that is, whether they extend through the lower strate. Miners had always W. J. Gibson, Otis Hoyt, and Benj. Allen (Senasupposed the veins to stop at the blue limestone and Dr. Owen gave the opinion that lead would Chien to the St. Croix Lake, with power to connot be found in the magnesian limestone. Great lis'nt ral taken from it during the past season. So that the result follows that the veins, being true veins, large operations may safely be entered into, and the lecturer ventured the assertion that 40 companies, with capitals of \$50,000 to \$200,000,

might be profitably engaged in the business. The work thus far done in this regeion had been of a superficial nature, and during the last few years vast numbers of the miners had been drawn off by the California excitement, but yet the results had been immense in their aggregate value, in some Fears amounting to 50,000,000 lbs. of ity, and if the policy of government, in removing the duty on lead, should not be unfavorable, the miners might look for an abundant reward.

Mr. Daniels now gave a briaf description of the character of the feesile found in the different of which will doubtless appear in this work.

strata, exhibiting specimens to the audience, is llustration of the physical history of the region. Next, he remarked upon the other minerals ound, and stated that, by the examinations of the

chemist whom he had employed, it had been ascertained that the "blackjack," supposed by the miners from its glistening surface, to be of some alue, was in fact nearly worthiess, while the drybone," thrown away as worthless, was in act a valuable variety of Zinc ore, and abounding n sufficeint quantities to supply the great and inreasing demand for that ore, used in the arts as

substitute for white lead. Mr. Daniels stated that so far from his employment for the State being an object to him pecuniarily, he performed his duties at a sacrifice to himself. The sum voted was \$2,500, for himself his assistant, and all expenses, including the ser ices of a chemist. He had offers much more at tractive from other States, and did not profess to se above pecuniary motives; but he was desiron f doing what he could to aid in the development of the resources of the noble State of his adoption nd was willing to devote all of his energies and bilities to that end,

He closed with an eloquent appeal to the Legislature to lay aside all prejudice, to consider the subject fairly, and to aid with all the meaus n their power, and with hearty good-will, all measures intended for placing Wisconsin where the God of nature, by providing boundless esources, had intended that she should stand,n the front rank of her sister States, twenty-siz of whom had authorized geological surveys, all of which had vindicated the wisdom of the Legisla ares which had authorized them, The above sketch gives but a faint idea of the

Madison, January 28th, 1854. 7, P. M. "Having written out a sketch of Prof. Daniel's" ecture to-day, I did not intend to write more, but there are several matters which seem to require otice, and I resume my pen.

You will remember that some long time since before the great storm (and, by the way, the sonw has fallen here thick and fast again to-day) made some allusion to A. F. Pratt's 'lobbying' or the bill which proposed so summarily to turn he State Agricultural Society out of its room.'-He tells me that I was mistaken, and that he labored to have it laid on the table. I made my statement on the authority of several members who still insist that they were right, and that it was not till Mr. Pratt obtained some conditions from the Secretary that he said anything about abling the bill. It is of no great consequence,

There is so little strict party feeling here that it is not till to-day that I have learned that Mr. Spafard, set down in our Assembly list as a freesoiler, is a whio, and Mr. Lake, of the same county, set down as a whig, was elected as a freesoil-

One matter under consideration in Assembly o-day deserves more than the brief telegraphic cotice which I have given it. It will be remembered that, about a week since, a resolution pass d, calling upon the Secretary of state for a list of the school fund loans—the names, amounts. eferred to select committee, on motion of Mr. sees I think; at all events Mr. Lees was made chairman of the committee, and another "demorat" with him, the third being Mr. Allen, a whig, from Walworth Co. Mr. Allen has been constantly endeavoring to get a report, and was urprised this morning by seeing a committee come in from the Secretary of state, enclosing what purports to be, and may be, a true list, such as was called for. Well—this list was called for by the House, for information as to the matters referred to; that of course. So Mr. McOracker moved that it be printed, as the only manner in which the House could see it. But what follows? Why, Mr. H. S. Orton rises and suggests that the list may contain matters relating to private ndividuals which it would not be best to pubish! Instantly a democratic member on the other side of the House moves to refer the repor o another select committee, of which Mr. Orion should be Chairman, and so the thing was done the old committee being still in existence. The speaker appointed Messrs. Orton, Talmadge, and Despoyers as the committee, the first having committed himself, the second being a "reg. dem, and the last being taken on trust, probably because he voted for Mr. Horn for speaker. The game will fail as to Mr. Desnoyers, and if this list is to be pocketed, it will not be by his help .--Why should it not be printed? Can any one movine? The manoeuvre of to day has only had the effect to confirm the suspicions entertain

And, while I am upon this subject. I may as well say, that, in the course of frequent conversations with whig members here, I have heard surprise expressed at the singular course of Mr. Orton. The remark has been made that, from the opening of the session, when he voted for Mr. Horn for Speaker, he has almost uniformly been found speaking and voting against his whig friends. So often has this been noticed that he has come to be regarded as occupying a very doubtful political position. Perhaps it may be hought that these are hasty words relative to an old and well known whig. It is just for the reason that Mr. Orton is, or was, an old and wellknown whig that I think his position, being a prominent one here, should be known, so that if any one chooses to follow him, he shall do it with his eyes open.

It is now, understood that, Messrs. Knowlton Remington, and Davis, of the Judiciary commit-tee, are in aver of the bill authorizing the election of a U. S. Senator at this session. I have it too, from pretty good authority, that Mr. Orton, like Barkis, "is willing." Mr. Webster, of our city, slore opposes. At present, it looks very much as if the game would succeed. The plot is deen laid, the offices and plunder promised, and the bargains mostly made. Some of these interesting items of history will leak out. Query !whother the desire to conceal the names and condition of the borrowers from the School Fund bas anything to do with this plot? By the bye, if that list is ever published, it will make a very fair ceusus of one of the cliques of Loco Foco operators in our state. They say that a whig or free

There is no doubt that the party leaders who nave concocted the notable scheme for defrauding he people of any voice in the selection of United States Senator, by anticipating the time fixed by law for that purpose, are not only in earnest, but confident of carrying their point. The Burr Oakdemocratic paper, in view of the probable sucess of this plot sensibly says:

If this legislature are determined upon going into an election for U.S. Senator this winter, they will be very faolish, to stop with electing only one Senator—while they have their hands in they may as well elect for twenty years to come. They have the same power to elect for the coming twenty years, as they have for this one. Git, gentlemen. It is harmless play, only it is a little expensive to the people. Of course, the next legislature wouldn't disturb your work.

WHEAT AND PORE COMING TO MILWAUKER. The Watertown Register, of Monday, says:

The Watertown Register, of Monday, says:

The sleighing has been excellent for the past few days, which has had the effect to bring forward large quantities of produce of all kinds, particularly pork and grain. The extraordinary prices paid for wheat has given renewed vigor to the hashess of the road. We saw loads of wheat the last way to Milwaukee, from the Baraboo thery, sevenly miles west of this place.

The transportation of pork has also formed a saignificant. In returning from Milwaukee last week, we were surprised at the unprecedented minister of teams loaded with this article. In one metastic thirty terms in Indian file. Strangers in our State naturally require where all this lark context from. It is a notable fact that three years are, our people looked for a supply of this atticle from Hilmole. Now we are able to supply a small world with the article.

Porwarders on the railroad, both East 2nd West of us, have refused to take freight for the cirr, in consequence of which our morchants are unable to get their goods from Buffalo, Dunkirk or Cieveland,—Eric Chron.

This is a just retribution. As the people This is a just retribution. As the people of Eric have chosen to "sow the wind," they should be self to "reap the whirlwind." Business men should decline all traffic with them. They deserve neither fellowship nor sympathy. They have decommoded the public, disregarded contracts, thicken the laws and destroyed private property. Perhaps when they are themselves made, for a time, to feel, pecuniarily, the effect of their criminal conduct, they may be induced to abandon the unjustifiable position they have assumed.—Albany Jour.

Thos. H. Benton's Great Work Thos. H. Benton's Great Work.
THIRTY YEAR'S VIEW, of the workings of the American Government. Published by D. Appearson & Co.,
ew York, and sold exclusively by subscription.
During the last thirty years there has been no important public measure in which titls notive and distinguished statesman has not taken an able and decisive part, and been familiar with the influences, whether secret or public, which have urged forward or copnosed each. He is thorefore well qualified to write the listory of this period.
This work will be completed in two volumes, the first of which will be published early in the year 1854, and will be brought down to the close of the administration of Gen. Jackson, and will thus form a complete work by Iself, containing shout 700 double column, 1934 S to, 1936, payable on delivery of the book.
The book of subscription, t gether with specimen sheets, can be found at the law office of Measirs TUGKER & GARVEY; and the Agent will soon give an opportunity to persons desirous of subscription to do so at their cettedenes and places of business throughout the city and county.

Dear Sir: By the advice of a friend of mine, who had been using your Hair Restorative, I was induced to rry it, discovering, to my great astembarrous, that my friend's batr, which, when I last saw high before, was cery gray, bal been completely restored to its original color, having as the glossy appearant e as it had when I knew him twenty years ago. the glowy appearance as it had when I know lifer twenty years ago.

I commenced using the Restorative about five weeks ago, and am perfectly convinced that it will produce the desired effect, it having restored the color of my hair, more than har of which was white, to precisely the same it was when I was twenty years old, with the same heat my and glossy appearance. I have no hesitation in recommending it to my feants and the public generally, believing that it used according to directions they will not be disappointed. Yours, very respectfully,

It ours, when taken according to directions, in TWENTA MINUTES, leaving no fever after the Cnill; very soldom requiring more than ONE DOSE to make a PREMANENT CURE. A great number of cases, from two to five years standing, have been CURED with the FIRST DOSE, and the Chill has never, as yet, returned. The beauty of this medicine is, that it stops the Chill in TWENTY MINUTES, or less, and the patient will be entirely clear from Fever after the Chill, which is not the case when any other medicine is used. It has superseeded all other preparations wherever it has been introduced.

Healt what the Editors of the Louisville Democrat say from their own observation:

"Dr Urban's medicine for the cure of chills and fever has effected some wonderful cures in our own midst. A young man who has resided for several years in Louisiana, reached Now Albany a flow weeks since, weak and emacined—liferally worn out physically, with long continued chills and fever. He made a short stay at the house of Judge Smith, where his old disease continued with no less severity than at home in Louisians. Having exhausted almost every rentedy known to the medical profession, he procured a hox of Dr. Urban's celebrated medicine, and after taking two powders was entirely relieved and restored to health.
